

At Pediatrics Plus*, we are specialists in the care of infants, children and adolescents. The clinicians in our group are well-trained, board certified/board eligible, indicating that they are recognized as experts in their field. We carefully choose our caring and compassionate office staff to provide the all important link between clinician and patient in the office and on the phone.

Our basic philosophy is that nurturing and caring for children demands a trusting partnership between clinician and parent. We attempt to provide your child and your family with both treatment and education in order to help your child be healthy and thrive. To accomplish this, we provide extended hours throughout the week and on Saturday. We are committed to being available to serve your health care needs 24 hours a day, every day of the year.

We encourage you to become partners with us in caring for the physical, emotional, and social well-being of your child. We believe that there is no greater honor than being entrusted with your child's health. We look forward to the privilege of caring for your child and serving your family.

Our Mission

The Mission of Pediatrics Plus* is to improve children's lives by providing comprehensive services addressing their physical, emotional and developmental needs. Our board certified/board eligible pediatricians and nurse practitioner work closely with parents and their children to raise happy, healthy, confident and caring young persons.

Pediatrics Plus* has been serving the children of North Haven, Hamden, Wallingford, North Branford and surrounding towns for more than 30 years. Availability, accessibility and affordability have always been important to us.

- Our services are available from 8 AM to 8 PM most weekdays, and all day Saturday.
- We have telephone availability 24/7, and see children for urgent visits on Sunday.
- Our office is easily accessible from multiple highways.
- We participate with most insurance plans and Medicaid.
